PRICING

Conscious environmental practices are really important to me and guide each and every decision in my business. This means I never use floral foam, bleached or preserved blooms and source 99% of the blooms that go into my designs from local growers, honouring the seasons. I love designing rich layered, textural and abundantly beautiful garden arrangements.

My pricing is carefully considered and takes into account my work practices, extensive experience, industry knowledges and unique style, all of which helps to create a professional and stress-free experience for you. Travel, labour and hire costs will be calculated and added to your quote based on the total invoice and overall job requirements. I only take on a limited number of weddings and events each year to ensure I can provide each of my clients and the flowers the time and attention they deserve.

If you have any questions or need guidance around choosing the right options for you, I am here to help you work through the process! Just shoot me an email to info@wildinlove.com.au and we will get everything sorted.

I was truly blown away when I walked into the barn on Friday night. Everything was so beautiful and it's exactly how I pictured it.
